Offer No.	86555
Summary of offer	Export/Joint Venture: Israeli Dates

Description of Offer

An Israeli company specializing in producing & exporting Israeli fine dates is offering its production to the market. The company's advantage is producing unusual Dates with high nutritional values, juiciness, big in size and with marvellous taste. The potential partners are distributors / importers, representatives. The company is looking for commercial agency and distribution services agreement.

Being one of the leading of its kind in Israel, the company makes use of its vast expertise in the growing and exporting such dates as Medjool, Hayani, Deglet Nour and Barhi for more than 30 years.

Unlike many others, the company is responsible for the overall process of its dates trade and offers a wide range of products and all-year-round fruit availability.

The company owns a modern packing house equipped with state-of-the-art machinery that meets the industry's highest standards and is producing about 2500 tons a year.

The proximity of the packing house to the plantation cuts down transport costs and keeps the fruit fresh and undamaged.

The company's quality assurance system is among the strictest in the world covering all stages of the process, from planting and growing, through sorting, to packing and delivering. This tight supervision ensures that the company's production, as well as its facilities, meets the highest health, safety, quality and environmental standards in the industry. Only this company has the ability to grow dates and pack them at its own packing house – all under meticulous quality restrictions. This grants the company complete control over the quality and quantity of the product, and enables it to meet its customers' highest requirements and strictest schedules. The production of this company is accredited by GlobalGap, B.R.C. (British Retailers Consortium), and ISO 9002.

The biggest slice of the company production – organic as well as conventional - is exported and sold to large supermarkets in Western Europe, while approx. 40% is being marketed by brokers and major importers worldwide. The production is exported mainly to the European market and to other countries such as the U.S, Turkey, Australia and Morocco.

Though small in size, Israel location alongside the Mediterranean Sea, positions it as a bustling junction between East and West. The constant air and marine traffic allows - often even daily - departures of fresh production from Israel to world markets.

The company produces variety of products with special features. Their most popular date is the Medjool which, aside from its delicious taste, this date is regarded as highly nutritious, and warmly embraced by athletes, by children – and their parents – who replace candy for a piece of nature. It is low in calories yet rich in fiber; an edible delight that provides an energy boost for children and adults.

The dates are stored frozen, thus maintaining their perfect condition and giving them a longer shelf-life. The company is looking for cooperation with distributors, importers of dried fruits, fresh production and packaged fruit production companies.

Potential Partners	Importers and Distributors.
