Subject: Brake Drums from China and Turkey (Final)--Draft Questionnaires for Comment

Dear Counsel:

Drafts of the producer, importer, purchaser, and foreign producer questionnaires for Brake Drums from China and Turkey (Inv. Nos. 701-TA-729-730 and 731-TA-1698-1699 (Final)) are now available on the Commission's electronic document information system (edis.usitc.gov) under Investigation Number "701-729" as Document Type "Questionnaire-Blank" (also attached to this email). Comments and suggestions regarding the draft questionnaires are due by 5:15 p.m. on October 4, 2024. Comments should include an explanation for all suggested additions and modifications and take into consideration the likely burden of the suggestions on questionnaire respondents. All comments must be submitted in writing to the Commission in accordance with Commission rule 201.8. In addition, parties to this proceeding must serve their comments on all parties on the public and APO service lists.

In your comments, please also address the following requests:

- Please answer the following questions concerning the existence of U.S. production of composite brake drums:
 - (1) Has there been any U.S. production of composite brake drums since January 1, 2022?
 - (2) Are composite brake drums currently being produced in the United States?
 - (3) If your answer to either (1) or (2) is "yes," please
 - (a) Identify names, addresses, and valid email contact information for the U.S. producers of composite brake drums (including Meritor, if applicable).
 - (b) Indicate whether or not there is any overlap between composite brake drum producers, production processes, and uses and subject brake drum producers, production processes, and uses.
- Please also include the names, addresses, and valid email contact information of any firms that produced in-scope brake drums since January 1, 2022 (including Meritor, if applicable).
- U.S. producers and importers are also requested to identify in an attachment the names, email addresses, street addresses, contact persons, and telephone numbers of their firm's 10 largest customers for brake drums since January 1, 2022, if they have not already provided such information to the Commission.

Please note that the period for which data are to be collected in the final phase of the investigations is subject to change.

The Commission will also be instructing firms to submit their questionnaire response(s) in the fillable MS Word forms via the Commission portal, or by email. All questions including all data tables should be answered in the fillable form. The submission of questionnaire responses in the MS Word fillable form allows the Commission to

electronically extract data from questionnaires and thus, compile, assess, and analyze submitted data more efficiently and promptly. If your client will be unable to complete and return the entire questionnaire in the fillable MS Word form after finalized and issued to companies, please provide the specific reason(s) in your submission for comments on the draft questionnaires.

Please provide all comments by **Friday, October 4, 2024.**

Thank you,
Mary Messer
